TOP LEVEL TECHNICAL SUPPORT CONTRACT LW-473  
ACTIVITY REPORT FOR DECEMBER 1958

On 8 December 1958 [ ] visited the facilities of the System IV contractor for the purpose of testing a modified Mark IA Tracker for R.F. interference. This was the culmination of a series of laboratory tests which provided data for the interference reduction program; the tracker having been examined in detail, and modified with a system of suppressors of various kinds. As a result of this test, specific and quantitative values of residual interference were obtained relative to the threshold sensitivity of the System IV.

25X1

The technical report covering the entire interference reduction program, dated 30 January 1959, provides technical information concerning test results and subsequent improvements.
